EHS 362 - Safety for Non-Lab Use of Chemicals
Course Syllabus

Subject Category: General
Course Length: 1.5 hours
Delivery Mode: Web-based Training

Course Prerequisite: None
Medical Approval: None
Frequency: Every 3 Years

Course Purpose: This course provides information to Lab employees in on the hazards and controls associated with chemicals that may be encountered in a non-laboratory research setting. Such information will include methods and observations that may be used to detect the presence or release of a hazardous chemical in a work area. It will also include the physical and health hazards associated with chemicals in a work area, along with the steps employees can take to protect themselves from such hazards.

Course Objectives:

1. Identify who to contact to discuss safety concerns
2. Recall how to obtain and use information resources to help keep you safe while performing work with chemicals
3. Recognize the two most important routes of exposure when working with chemicals
4. Recall the physical hazards associated with flammables and combustibles
5. Recall the health hazards associated with work involving corrosives and toxic chemicals
6. Recognize when to use fume hoods and glove boxes
7. Identify how to properly select, dispose, and store personal protective equipment
8. Recall the laboratory requirements for eating and storing food
9. Identify good housekeeping practices
10. Recall the posting requirements for work areas containing hazardous chemicals
11. Identify how to properly label and safely store chemicals
12. Recall the chemical inventory responsibilities of PIs
13. Recall the chemical exposure detection methods
14. Recognize the warning properties of chemical exposure
15. Recognize what to do when a spill occurs
16. Identify what to do in personal exposure emergencies
17. Recall the fire extinguishers requirements when working with chemicals

Subject Matter Expert: Larry McLouth

Web-based Instructional Designer: Brooke Vaughn

Training Compliance Requirements: OSHA Hazard Communication 29 CFR 1910.1200

Course Instructional Materials: Web-based course and a PDF downloadable version of the course is available within the course.

Performance Criteria: Employees will be asked to demonstrate what they have learned from the web-based training by taking a quiz at the end of the course. Employees must pass the quiz with a 80% score to receive course credit.
