**EHS 364 ~ Asbestos Class III (4 Hour) Training**

Course Syllabus

**Subject Category:** Occupational Health  
**Course Prerequisite:** N/A  
**Course Length:** Approx. 4-5 Hours  
**Course Prerequisite:** N/A  
**Delivery Mode:** Classroom  
**Medical Approval:** N/A  
**Schedule:** Periodically Scheduled by the Facilities Division

**Course Purpose:** The purpose of this training is to teach Facilities Division crafts employees, or other employees, who incidentally disturb small amounts of asbestos containing building materials, the hazards associated with asbestos, the types of building materials that may contain asbestos and the proper work practices to apply during incidental disturbance of these materials as part of Facilities crafts work or disturbance work by other employees.

**Audience:** This course is intended for Berkeley Lab craft employees who may disturb small, incidental amounts of building materials that may contain asbestos as part of their trade.

**Course Objectives:**
- Physical properties of asbestos and the types of materials that contain asbestos
- Health effects associated with asbestos
- Specific training related to work practices for incidental disturbance of asbestos containing building materials.
- Hands on training and demonstrations related to work practices such as drilling holes in walls that may contain asbestos.

**Course Instructional Materials:**
- Power Point Presentation
- Hands on demonstration with active class participation on asbestos control work practices
- Copy of power point slides
- Interactive learning tool used in class to track student responses to quizzes and to track progress

**Instructors:** Vendor provided training

Training Compliance Requirements: OSHA’s Asbestos in Construction Regulation, 29 CFR1926.1101, requires training for maintenance, construction and other employees who may disturb small amounts of asbestos during maintenance and operations (M&O) type work. Normally this training is 16 hours for Class III work unless a “competent” person determines alternative training is more appropriate for the type of work to be done by the workers. In these cases, OSHA states the training should take approximately 4 hours to complete.

**Course Handouts:**
- Copy of power point presentation and O&M work practice procedures.

**Participant Evaluation:** Written evaluations regarding the effectiveness of the trainer, the training, and the visual aids.

**Written Exam:** N/A

**Practical Exam:** N/A

**Retraining/Recertification:** Annually
