Training Program**

**Course Syllabus
EHS 0798 ~ HHWF Contingency Plan Training**

Subject Category: RCRA Contingency Plan
Course Length: 1 hour
Delivery Mode: Instructor Lead

Course Prerequisite: None
Medical Approval: None

Course Purpose: The purpose of the course is to present the HHWF Contingency Plan and to review its major components and implementation. This course is designed for new and current LBNL staff who perform work at the Hazardous Waste Handling Facility (HHWF Building 85). Its role as an emergency resource document is also presented. The course content meets the regulatory requirements for initial and annual Contingency Plan training.

Learning Objectives:

Understanding of the:

- Implementation of the Contingency Plan;
- Contents and location of the Contingency Plan;
- Differences between a major and minor spill;
- Location and physical description of emergency equipment at the HHWF
- Internal communications and alarm system;
- Communication devices capable of summoning emergency assistance from outside emergency responders;
- Use and limitations of personal protective equipment;
- Portable fire extinguishers and fire control, spill control and decontamination equipment;
- Arrangements with site-wide (ERO), local and State emergency responders;

Training Compliance Requirements: 42 U.S.C. 6924(a)(5); 40 CFR 265, Subparts C and D; 40 CFR 265.31; 40 CFR 265.51; 40 CFR 265.53, 265.54; 40 CFR 265.35; 40 CFR 265.37

Written Exam: No

Practical Exam: In Class

Retraining/Recertification: Annually
